## Could you be a VETS volunteer?

The PC are looking to set up a group of volunteer responders. Anyone could call the VETS number for help (such as taking the defibrillator to a cardiac arrest) looking for practical help and moral support.

The number would ring volunteers simultaneously and you would get the option of answering or rejecting the call. You don't need to be around all the time or have any specific training.

Initially we just want to find out if there are enough people willing to volunteer to make it viable. If you would be willing to be on the rota please let me know on 07887 886945.
